

Huawei Technologies Co., Ltd. is a leader in providing next generation telecommunications networks, and serves 45 of the world's top 50 operators, as well as over one third of the world's population. We are committed to providing innovative and customized products, services and solutions to create long-term value and potential growth for its customers. Our products and solutions include wireless products, core network products, network products, application and software, as well as terminals. At the end of 2016, we had over 170,000 employees. Our global R&D spending reaches 13 % of the annual revenue. In 2016 our revenue reached 75.1 billion USD. We started to operate in Hungary in 2005; we have manufacturing centers in Komárom and Páty as well. Our European Logistic Hub operates from Biatorbágy. We sincerely invite professionals to join us and develop together with Huawei. For further information, please visit us now at <http://www.huawei.com> and <http://www.huawei.hu>

## Intern, Software Development

Huawei has built its public cloud in more than 20 regions around the world based on OpenStack together with a newly-established public cloud SRE technical team based in Budapest to manage these clouds in continuous expansion, providing efficient and stable operation. Working together with top telecom operators in Europe we provide technical support for the large scale public clouds. Our team consists of several Internet, OpenStack, network and public cloud experts. In order to further support our customers in Europe, we are expanding our footprint in Hungary. You are welcome to join us if you are diligent, love the Internet and interested in gathering experiences in public cloud technology. You can learn and practice the knowledge and experience of the Internet, ultra-large-scale distributed systems, 5G, AI, Image processing, Streaming media, the cloud compute and eventually become an elite in the related knowledge areas.

### **Responsibilities:**

- You will drive your own learning and development with guidance and coaching from your manager, buddy and colleagues around you.
- You will be part of a team of software engineers and you will help them create complex tools in several different programming languages that will help improve the efficient of operation.
- You'll create professional quality software by applying software engineering best practices, while being exposed to cutting edge technologies.

### **Expectations**

- Knowledge of Computer Science fundamentals such as object-oriented design, algorithm design, data structures, problem solving, and complexity analysis
- Familiar with Java, C, C++, shell, go, Python, Linux
- Knowledge of software engineering practices & best practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations

- Basic familiarity with web technologies (HTML, CSS, JavaScript, React)
- Understanding of, and practical experience with, machine
- Intermediate English

**Working Place:**

Budapest, Infopark
